

JoAnne and Jimmy Moriarty

We were doing business in Libya since 2007 January. We make a unique enzyme that rejuvenates oil wells and cleans up sludge pits, cleans out pipelines and tanks and does a lot of neat things to oil. We had booked a huge amount of business in Libya from 2007 to 2011: \$5 billion dollars worth of our product to be more exact. We had signed a JV with the Social Security Investment Fund of Janzour near Tripoli, Libya. We were beginning to build a production facility to fulfill these contracts for our enzyme when the so called Libyan revolution began in February of 2011.

We came here on a fact finding mission and have learned things that have shocked us to our core. We are witness to numerous atrocities by NATO and these so called rebels being supported actively, in any way, by NATO. The treatment of Libyan civilians as if they are not human and have no rights, the blatant killing, raping, murdering and bombing of all kinds of civilians and civilian infrastructure removes any thought of legitimacy that NATO or these rebels could ever hope to garner. We stand as witness to the world and we scream to the world STOP THIS INHUMANITY, STOP THE KILLING, STOP THE SEIGE, on the innocent people of Libya. NATO and their illegal minions do not want to accept that 90% of the Libyan people DO NOT WANT THESE rebels in charge of anything. So, what next, kill 90% of the Libyans? Where is their mantra - "we want democracy?" - Now?
