

About Lou Paradise

Lou Paradise is a Decorated Marine Corps veteran on a mission to help as many people as possible. He has been researching and formulating natural medicine's ability to relieve pain for the last 15 years. He developed as CEO and founder of Topical BioMedics, a leading product, [Topricin®](#), to address his suffering with bilateral carpal tunnel syndrome. After a decade of research, Lou finally succeeded in engineering the company's proprietary technology, using a specific combination of homeopathic medicines that he believes helped him to avoid carpal release surgery and remain symptom free.

Lou has been a regular guest on syndicated radio programs hosted by medical and complementary care physicians who consider him an expert on the subject of trauma and ergonomic injuries. Lou is especially dedicated to the disabled elderly, children and veterans to provide a safer more effective solution in enhancing healing and relieving pain with no negative side effects.
