

Pete Hendrickson, author of 'Cracking the Code- The Fascinating Truth About Taxation In America'

Pete Hendrickson has literally 'cracked the Internal Revenue Code' by performing exhaustive searches to discover that Private Sector receipts are not subject to Federal Income taxes. Researcher, analyst and scholar Peter E. Hendrickson believes that after reading Cracking the Code, you'll agree that what has been misunderstood is the 3,413,780 word monstrosity itself– and how, and to whom, it applies.

Hendrickson delves deep into the history, statutes and case law behind the Code to reveal its startling and liberating secrets; and unless you live in a cave, you need to know what he's uncovered.

Once you've finished "Cracking the Code", the tax laws will never mean the same thing to you, or your bank account, again!
