

About Sharon

Sharón Lynn Wyeth [Shah-rone Y-ith] is recognized internationally as a name expert as she can determine one's strengths, challenges and the purpose of one's life by deciphering a person's name. Sharón created Neimology® Science, the study of the placement of the letters in a name, after 15 years of research followed by 3 years of testing her theories in over 70 countries, including Russia, India and China. She then continued to develop how to interpret names over the next seventeen years, which is why Neimology® Science is so accurate today. She wanted to see if her methodology held true in different languages, and indeed it does. The greatest gift that came from developing Neimology® Science was being able to see all people as One, as our basic desires remain the same regardless of where we live or what culture we are experiencing. Over the years, she has been able to support thousands of people around the world in understanding themselves and others better. Today she assists HR departments of different businesses in narrowing down the candidates to be interviewed, assists lawyers in how to present cases to judges, and couples and families on how to better communicate with each other. She also creates names for new business, new products and when people wish to change their name. Her bestselling book, "Know the Name; Know the Person" has won a award for excellence in writing. Sharón is a frequent guest on both radio and television and we are pleased to have her with us tonight.
