1,000 Architects & Engineers Call for New 9/11 Investigation

Cite Evidence of Explosive Demolition at Three World Trade Center Towers

SAN FRANCISCO — Richard Gage, AIA, architect and founder of the non-profit Architects & Engineers for 9/11 Truth, Inc. (AE911Truth), will announce a decisive milestone today at a press conference in San Francisco, as **more than 1,000 worldwide architects and engineers now support the call for a new investigation** into the destruction of the Twin Towers and Building 7 at the World Trade Center on September 11, 2001. After careful examination of the official explanation, along with the forensic data omitted from official reports, these professionals have concluded that a new independent investigation into these mysterious collapses is needed.

Mr. Gage will deliver the news around this major development, accompanied by signers of the Architects & Engineers for 9/11 Truth petition. The press conference will be held [concurrently in 38 cities in 6 countries](#). <http://www.ae911truth.org/info/190>

These prominent architectural and engineering professionals will discuss the organization's findings and concerns. A **brief presentation of the explosive evidence** they have compiled will be followed by Q & A. The presentation is an important update of "*9/11: Blueprint for Truth – The Architecture of Destruction*," the DVD produced by the organization, and available on their website AE911Truth.org, which analyzes the **scientific forensic evidence concluding that the three skyscrapers in New York City were demolished with explosives on 9/11**. The petition will be delivered today to every congressional representative by AE911Truth petition signers throughout the country. Government officials will be notified that "Misprision of Treason", US Code 18 (Sec. 2382), is a serious federal offense which requires those with evidence of treason to act.

Gage and his group base their conclusions on forensic evidence. Gage states, "The **official FEMA and NIST reports** provide insufficient, contradictory, and fraudulent accounts of the circumstances of the towers' destruction. We are therefore calling for a grand jury investigation of NIST officials. Gage points out the destruction of the *third* high-rise, **World Trade Center 7, a 47-story skyscraper** which was *not* hit by an aircraft, yet came down in pure **free-fall acceleration** for more than 100 feet, a significant fact that NIST has been forced to admit, due to research conducted by AE911Truth petition signers. Other disturbing facts emerging from the forensic evidence include:

- Complete destruction of both Twin Towers in just 10 to 14 seconds at near free-fall acceleration
- Over 100 first-responder reports of explosions and flashes at onset of destruction
- Multi-ton steel sections ejected laterally 600 ft at 60 mph
- Mid-air pulverization of 90,000 tons of concrete & metal decking
- 1200-foot-dia. debris field: no "pancaked" floors seen in the debris pile
- Several tons of molten metal found in debris.

- Evidence of advanced explosive nano-thermitic composite material found in the WTC dust by an international team of scientists

AE911Truth's conclusions are shared by thousands of scientists; senior-level military, intelligence and government officials; pilots and aviation professionals; firefighters; scholars and university professors; and 9/11 survivors and their family members. The implications are enormous and may have profound impact on the forthcoming Khalid Sheikh Mohammed trial.

The 9/11 Truth Movement, which *Time* magazine in 2006 called "a mainstream political reality," continues to gain momentum. As AE911Truth's own influence grows, Gage has embarked on well over 130 speaking events, covering 20 states and 13 countries, including Australia, New Zealand, and Japan. He has been interviewed by media around the world – including the BBC, CBC, NatGeo, and Fox TV.
